**XDJ-AERO**

**Guide for creating a Sample Launch Bank**

## Introduction

The Sample Launch function of XDJ-AERO allows you to select the playlists in your USB device linked to the unit as a bank.

(This function works when the XDJ-AERO firmware is Version 2.0 or later.)

This guide illustrates the procedures from how to sample a music file using rekordbox to how to add it to a playlist and export it to a USB device.

## Preparation

1 Launch rekordbox.

2 Create a playlist for a Sample Launch bank.

## How to create a Sample Launch bank

1 Play a music file.

2 Set a Loop In point at the sample head and a Loop Out point at the sample end.

\* If the sample created using rekordbox is 2 seconds or longer, only 2 seconds from the sample head can be used as a sample in the Sample Launch function.

- 3** Right-click on the enlarged waveform display on the player panel while the loop is playing and select [Export Loop As Wav].

- 4** The screen named [Export Loop As Wav] is displayed. After selecting the location to save the music file, click [Save].

Extracted loop elements are saved as WAVE files (48 kHz sampling frequency, 16-bit quantization) and added to the rekordbox music collection. The filename specified for the WAVE file when it was saved is displayed in the title column on the [Collection] pane.

- 5** Drag the saved music file from the [Collection] pane to add it to the playlist.

Take the above steps from **1** to **5** to add up to 4 files to a playlist. The 1st through 4th files in a selected playlist on a USB device are assigned to [FX SELECT 1 ~ 4] buttons of the Sample Launch function. The 5th and later samples in the playlist are not displayed in the Bank Selection Screen on this unit.

- 6** Connect the computer and the USB device.

- 7** Export the playlist to the USB device and remove it from the computer.

This is to complete creating a Sample Launch bank.

Press the SAMPLE LAUNCH button for longer than 1 second after connecting the unit to the USB device, the created playlist can be selected as a sample bank.

- Please refer to the Operating Instructions of rekordbox (Mac/Windows) for further details of rekordbox.
- Please refer to the Operating Instructions of XDJ-AERO for further details of the Sample Launch function.
