“VIRTUAL DJ LE”
Guide to Sound Effects
Table of Contents

Introduction

In this Guide, brackets [ ] are used to indicate the names of screens and menus displayed on the GUI of Virtual DJ, and those of buttons and terminals on DDJ-WeGO. (e.g. [RECORD] panel, [CONFIG] menu and [Cue] button)

1 Cut ............................................................................................................................... 4
2 Delay ........................................................................................................................... 5
3 flanger ........................................................................................................................ 6
4 EchoDoppler .............................................................................................................. 7
5 Reverb_TexZK ......................................................................................................... 9
6 NoiseBell .................................................................................................................. 10
7 Gates_TexZK .......................................................................................................... 12
8 GATE ...................................................................................................................... 14
9 RingMod .................................................................................................................. 15
10 ROLL ....................................................................................................................... 16
11 dsp Phaser ............................................................................................................. 17
Note

- Depending on the computer you use, the available Sound Effects are different.

- *Click the [EFFECTS] tab on the GUI of the Virtual DJ to display the [EFFECTS] panel, which is described in this Guide. Press the [JOG FX] button on DDJ-WeGO to go back to the [BROWSER] screen.
1. Cut

1-1. Overview
When this effect is activated, the sound can be cut in the selected number of beats.
One parameter is adjustable on DDJ-WeGO.

1-2. Setting parameter

Mute beat
Select whether the timing of cutting the sound should be before a beat or on a beat.
If On is selected, the sound is cut on a beat.
The parameter can be adjusted on the GUI of Virtual DJ.

Cut length
Select the beat length to be cut.
Turn on the [JOG FX] button and rotate the [JOG] to select the beat length to be cut.
2. Delay

2-1. Overview
When this effect is activated, delay effect is added.
Two parameters are adjustable on DDJ-WeGO.

2-2. Parameter settings

Invert Phase
Click this button to set the phase to be inverted.
If it is On, the effect is emphasized.
The parameter can be adjusted on the GUI of Virtual DJ.

Reset
Click this button to reset the parameter to the default value.
The parameter can be adjusted on the GUI of Virtual DJ.

Wet/Dry
Adjust the balance of the original sound and the effect sound.
Turn on the [JOG FX] button and rotate the [JOG] to adjust the balance.

Delay
This parameter selects the number of beats.
Press the [JOG FX] button while pressing [SHIFT] and rotate the [JOG] to select the beat.

Adjust Delay
The level of delay can be tweaked so that the sound should not be cracked or overlapped.
The parameter can be adjusted on the GUI of Virtual DJ.
3. flanger

3-1. Overview
When this effect is activated, flanger effect synced with the beat is added.
Two parameters are adjustable on DDJ-WeGO.

3-2. Parameter settings
Delay
Adjust the level of flanger effect.
Press the [JOG FX] button and rotate the [JOG] to adjust the effect level.

Volume
Adjust the volume of flanger effect.
Press the [JOG FX] button while pressing [SHIFT] and rotate the [JOG] to adjust the volume.
Turn the [JOG] clockwise to increase the effect volume.
4. EchoDoppler

4-1. Overview
When this effect is activated, echo effect is added.
Two parameters are adjustable on DDJ-WeGO.

4-2. Parameter settings

Reset
Click this button to reset the parameter to the default value.
The parameter can be adjusted on the GUI of Virtual DJ.

Beat
Click this button to synchronize the [Depth] with a beat.
The parameter can be adjusted on the GUI of Virtual DJ.

Half beat
Click this button to synchronize the [Depth] with 1/2 beat.
The parameter can be adjusted on the GUI of Virtual DJ.

Additive
Click this button to activate/deactivate Additive.
The parameter can be adjusted on the GUI of Virtual DJ.

Ping-pong
Click this button to activate/deactivate the Ping-pong effect.
The parameter can be adjusted on the GUI of Virtual DJ.

Dry / Wet
Adjust the balance of the original sound and the effect sound.
Press the [JOG FX] button and rotate the [JOG] to adjust the balance.
**Depth**
Adjust the [Depth] level.
Press the [JOG FX] button while pressing [SHIFT] and rotate the [JOG] to adjust the [Depth].

**Feedback**
Adjust the feedback volume.
The parameter can be adjusted on the GUI of Virtual DJ.

**High-pass**
Adjust the level of High-pass filter.
The parameter can be adjusted on the GUI of Virtual DJ.

* When the track is paused while the EchoDoppler is on, the attenuated sound is output depending on the [Depth] value even while the track is paused.
5. Reverb_TexZK

5-1. Overview
When this effect is activated, reverb effect is added. Two parameters are adjustable on DDJ-WeGO.

5-2. Parameter settings

Reset
Click this button to reset the parameter to the default value. The parameter can be adjusted on the GUI of Virtual DJ.

Dry / Wet
Adjust the balance of the original sound and the effect sound. Press the [JOG FX] button and rotate the [JOG] to adjust the balance.

Room size
Adjust the reverb effect level. Press the [JOG FX] button while pressing the [SHIFT] button and rotate the [JOG] to adjust the effect. Turn the [JOG] clockwise to increase the effect level.

Reverberation high-pass filter
Adjust the level of High-pass filter. The parameter can be adjusted on the GUI of Virtual DJ.

Reverberation low-pass filter
Adjust the level of Low-pass filter. The parameter can be adjusted on the GUI of Virtual DJ.

* When the track is paused while the Reverb_TexZK is on, the attenuated sound is output depending on the [Room size] value even while the track is paused.
6. NoiseBell

6-1. Overview
When this effect is activated, noise effect is added.
Two parameters are adjustable on DDJ-WeGO.

6-2. Parameter settings

Reset
Click this button to reset the parameter to the default value.
The parameter can be adjusted on the GUI of Virtual DJ.

Half beat
Select the echo length either 1 beat or 1/2 beat.
When this parameter is on, 1/2 beat is selected.
The parameter can be adjusted on the GUI of Virtual DJ.

Ping-pong
Click this button to activate/deactivate the Ping-pong effect.
The parameter can be adjusted on the GUI of Virtual DJ.

High-pass
Click this button to activate/deactivate the High-pass filter.
The parameter can be adjusted on the GUI of Virtual DJ.

Pink
Click this button to activate/deactivate the pink noise.
The parameter can be adjusted on the GUI of Virtual DJ.

Dry / Wet
Adjust the volume of effect.
Press the [JOG FX] button and rotate the [JOG] to adjust the effect.
**Frequency**
Adjust the [Frequency] level.
Press the [JOG FX] button while pressing [SHIFT] and rotate the [JOG] to adjust the [Frequency].

**Resonance**
Adjust the resonance level.
The parameter can be adjusted on the GUI of Virtual DJ.

**Echo feedback**
Adjust the echo feedback volume.
The parameter can be adjusted on the GUI of Virtual DJ.

*NoiseBell effect can be output regardless of whether a track is playing or not.*
7. Gates_TexZK

7-1. Overview
When this effect is activated, noise is added to the original sound which is cut in the selected number of beats.
Two parameters are adjustable on DDJ-WeGO.

7-2. Parameter settings

Inverted shape
Click this button to activate/deactivate the [Inverted shape].
When Inverted shape is activated, the sound is cut on a beat.
The parameter can be adjusted on the GUI of Virtual DJ.

Mute
Click this button to mute the original sound depending on the [Dry / Wet] level.
The parameter can be adjusted on the GUI of Virtual DJ.

Beat aligned
Select whether the Gates_TexZK effect is aligned with the beat grid.
The parameter can be adjusted on the GUI of Virtual DJ.

Reset
Click this button to rest the parameter to the default value.
The parameter can be adjusted on the GUI of Virtual DJ.

Dry / Wet
Adjust the balance of the original sound and the effect sound.
Press the [JOG FX] button and rotate the [JOG] to adjust the balance.

Gate frequency
Adjust the frequency of applying the Gate effect.
Press the [JOG FX] button while pressing the [SHIFT] button and rotate the [JOG] to adjust the frequency.
**Duty cycle / Modulation shape**
Select whether the sound is cut sharply or gradually.
The parameter can be adjusted on the GUI of Virtual DJ.

**Noise level**
Adjust the noise level.
The parameter can be adjusted on the GUI of Virtual DJ.
8. GATE

8-1. Overview
When this effect is activated, the original sound, which is higher than the threshold level, is output and the sound, which is lower than the threshold, is cut. One parameter is adjustable on DDJ-WeGO.

8-2. Parameter settings
THRESHOLD
Adjust the threshold level.
Press the [JOG FX] button and rotate the [JOG] to adjust the threshold.
9. RingMod

9-1. Overview
When this effect is activated, ring modulator effect is added.
Two parameters are adjustable on DDJ-WeGO.

9-2. Parameter settings

Reset
Click this button to reset the parameter to the default value.
The parameter can be adjusted on the GUI of Virtual DJ.

Mod^2
Click this button to square the sine wave.
The parameter can be adjusted on the GUI of Virtual DJ.

Dry / Wet
Adjust the balance of the original sound and the effect sound.
Press the [JOG FX] button and rotate the [JOG] to adjust the balance.

Frequency
Adjust the frequency level.
Press the [JOG FX] button while pressing [SHIFT] and rotate the [JOG] to adjust the [Frequency].

Stereo phase
Adjust the phase difference between stereo channels.
The parameter can be adjusted on the GUI of Virtual DJ.
10. ROLL

10-1. Overview
When this effect is activated, a track is recorded and the recorded portion is output repeatedly in the selected beat length. Two parameters are adjustable on DDJ-WeGO.

10-2. Parameter settings

**BEAT FX**
Select the beat length.
Press the [JOG FX] button and rotate the [JOG] to select the beat length.

**FILTER: LPF < -- > HPF**
Adjust the level of High-pass and Low-pass filter.
Press the [JOG FX] button while pressing [SHIFT] and rotate the [JOG] to adjust the [Filter].

**MIX: DRY < -- > WET**
Adjust the balance of the original sound and the effect sound.
The parameter can be adjusted on the GUI of Virtual DJ.

* The ROLL effect is synced with playback of a track. Please note that when the track is paused while the ROLL effect is on, you will hear beep sound. Ensure the ROLL effect is deactivated when the track is paused.*
11. dsp Phaser

11-1. Overview
When this effect is activated, the phaser effect is added to the output sound.
Two parameters are adjustable on DDJ-WeGO.

11-2. Parameter settings

Shape
Switch the [Shape] of the effect.
The parameter can be adjusted on the GUI of Virtual DJ.

Reset Phase
Click this button to reset the phase.
The parameter can be adjusted on the GUI of Virtual DJ.

Move
Click this button to activate/deactivate the [Move].
The parameter can be adjusted on the GUI of Virtual DJ.

Presets
Click this button to save or load the adjusted value.
The parameter can be adjusted on the GUI of Virtual DJ.

Length
Set the cycle of moving the phaser effect.
Press the [JOG FX] button and rotate the [JOG] to set the cycle length.

Strength
Adjust the [Strength] level of the Phaser effect.
Press the [JOG FX] button while pressing [SHIFT] and rotate the [JOG] to adjust the [Strength].
**Stages**
Adjust the [Stages] level.
The parameter can be adjusted on the GUI of Virtual DJ.

**Depth**
Adjust the [Depth] level.
The parameter can be adjusted on the GUI of Virtual DJ.

**Steps**
Adjust the [Steps] level.
The parameter can be adjusted on the GUI of Virtual DJ.

**LFO2**
Adjust the [LFO2] level.
The parameter can be adjusted on the GUI of Virtual DJ.
